

English

In English, some will begin to explore science fiction by reading classic stories by H.G. Wells. We will examine the main features of science fiction; writing will be developed through describing sci-fi settings and characters. Others will develop core skills through the study of fairy tales.

Mathematics

Pupils will be looking at statistics and geometry. In statistics, we will read and interpret types of graphs and pie charts. In geometry, we will look at drawing and calculating angles. Some will look at decimals; money and time and then try to transfer these skills into other areas.

Science

During our new topic, pupils will further their knowledge of the sizes and shapes of the sun, earth and moon. They will go on to develop their understanding of how day and night, and, the seasons happen before learning about the other planets in our Solar System.

Computing

Learners will develop their understanding of computer systems, how information is transferred between systems and devices. Learners will consider small-scale systems and large-scale systems. They will explain the input, output, and processes.

Humanities

Pupils will develop their understanding of how life may be for them in the future. They will identify what they would like to be doing, both as work and in their free time, and who with. Pupils will research and make a presentation about places around the world they would like to visit.

P.S.H.E

In this topic, we will discuss things that change as we become more independent, how our bodies and attitudes start to change and how friendships change as we grow.

Secondary Class AB

Newsletter

Summer 'A' 2022

Religious Education.

Pupils will further their understanding of the Islamic faith. They will learn about the prophet Muhammad and his teachings on kindness and truthfulness. Pupils will develop their knowledge of the importance of the '5 Pillars of Islam' to Muslims and about the Quran and Mosques.

Physical Education

Pupils will continue to develop their fitness through a series of walks through the local community. There will also be opportunities to take part in team building games such as rounder's and football golf.

Creative

In Creative, pupils will be developing knowledge of Art through the ages. They will embark on a broad study of different artists and genres through time such as Picasso, Monet, surrealism and de stijl.

Social Communication

Pupils will further their understanding of how our country is governed concentrating on local government and the local elections on the 5th May. Pupils will develop their understanding of what local councils do and how they spend our taxes to support education, the NHS and Policing.

English

Use the internet to research some features of science fiction stories, e.g. spaceships or time machines. Pick your favourite and write a fact file about it. What features does your spaceship, time machine or futuristic item have? What can it do? Would you want to have it yourself?
