

English

Pupils will be furthering their skills in interpreting signs and symbols within the community, especially around road safety, before designing their own symbols and signs for the classroom and around school.

Mathematics

Pupils will further their knowledge in identifying, naming and classifying the properties of both regular and irregular, 2D and 3D shapes. They will also experience the effects of rotation and reflection of shape e.g. using mirrors.

World Studies – Foreign Cultures

Pupils will learn about the culture of Japan through activities including using Google earth to find the country and some of its famous landmarks, trying typical foods and taking part in traditional art activities.

Computing and creativity.

Pupils will develop their skills in setting scenes and taking photographs to include in a stop animation film. They will further their knowledge of how to add sounds, speech and special effects to our final film.

Independence – Food technology

Pupils will order instructions to make puddings and then they will follow their instructions to make their puddings. They will evaluate their puddings and suggest how they could improve the puddings the next time they make them.

P.S.H.E – Relationships.

Pupils will further their understanding of their emotions and those of others. They will identify emotions felt during role play scenarios before discussing how the emotions of characters in films affect their actions.

Newsletter

Spring 'B' 2023

Religious Education.

Pupils will be looking at Judaism in the lead up to Easter. We will learn about the Passover and how significant this is to the Jewish religion. We will look at what they eat, drink, decorations and important places.

Physical Education

Pupils will be exploring different shapes that can be made from our bodies, such as tuck, pike, straddle and star. We will also be using a range of movements to travel across the hall.

Creative Art

Pupils will learn about and experience preparing food from different cultures. Students will be able to locate the country of origin on a map and carry out research tasks. Students will explore menus and online food shopping.

Communication

Pupils will further their communication and interaction skills through the use of memory maps. Pupils will give and follow instructions to complete tasks. They will also be designing their own memory maps to use.

English

When you are out with your child ask them to spot and explain which signs and symbols they can see. Which signs and symbols do they know really well and which are less familiar to them? Let us know on Seesaw.

Computing

Use your devices and the free iMotion app (for iPad or iPhone) or similar app for your device, to make your own stop animation films – we would love to see them.

Independence – Food technology

When you are making meals or snacks encourage your child to help you. Discuss hand hygiene before starting, which foods are healthy foods and which are treat foods, and which foods you eat for celebrations e.g. Easter.
